

multiPulse 160

Pulsed temperature control for complexe production processes, individually usable, with precise temperature control. Suitable for 16 tempering circuits per temperature control unit.

- Water distribution system up to 160 °C
- 4 to 16 cooling channels per temperature control unit
- Flow per channel 1 l/min-40 l/min
- Siemens SPS controlled control system with touchscreen
- Integrated volume flow and temperature measurement per channel

Technical specifications

| Outlet temperature | Heat transfer medium | Number of channels | Flow measurements per channel (Typ) | Connections |
|--------------------|----------------------|--------------------|---|-----------------------------------|
| 160 °C | Water | 4 - 16 | 1 - 18 (VFS) l/min 2 - 40 (VFS) l/min | G1 1/2" 60° Cone G1/2" 60° Cone |

Standard equipment

- Profinet interface connection to temperature control unit

Options

- Bypass
- Blow out
- Main connection temperature control unit: G1" 60° Cone, G3/4" 60° Cone, G11/4" IG
- Outlets (right or left): G1/2" IG, M22x1.5 (15l)
