

multiPulse 160

Pulsed temperature control for complexe production processes, individually usable, with precise temperature control. Suitable for 16 tempering circuits per temperature control unit.

- Water distribution system up to 160 °C
- 4 to 16 cooling channels per temperature control unit
- Flow per channel 1 l/min-40 l/min
- Siemens SPS controlled control system with touchscreen
- Integrated volume flow and temperature measurement per channel

Technical specifications

Outlet temperature	Heat transfer medium	Number of channels	Flow measurements per channel (Typ)	Connections
160 °C	Water	4 - 16	1 - 18 (VFS) l/min 2 - 40 (VFS) l/min	G1 1/2" 60° Cone G1/2" 60° Cone

Technical data

Outlet temperature		°C	160	
max.				
Heat transfer medium			Water	
Number of channels			4 - 16	
Sensors				
Flow measurement per channel (Typ)	l/min		1 - 18 (VFS)	2 - 40 (VFS)
Temperature measurement per channel			PT100	
Models				
Cooling channels			4 / 6 / 8 / 10 / 12 / 14 / 16	
Direction of outgoing channels			to the right or the left	
Housing				
without housing			IP44	
with housing			IP45	
Interface connection TCU				
Cable length	m		2	5
				10
Control system			SPS	
Operation			Touch 9"	
Operating voltage	V/Hz		24V DC	
Connections				
Main connection temperature control unit			G1 1/2" 60° Cone	
Outlets to consumer			G1/2" 60° Cone	
Dimensions W/H/D				
without housing (4-fold and 16-fold)	mm		445/190/301	445/190/898
with housing (4-fold and 16-fold)	mm		425/236/348	425/236/948
Color	RAL		7016	
Ambient temperature				
max.	°C		40	
Noise level	db (A)		--	

Standard equipment

- Profinet interface connection to temperature control unit

Options

- Bypass
- Blow out
- Main connection temperature control unit: G1" 60° Cone, G3/4" 60° Cone, G11/4" IG
- Outlets (right or left): G1/2" IG, M22x1.5 (15l)
